16 OCT 1981

MEMORANDUM FOR: Deputy Director of Security
Physical, Technical and Area Security

VIA: Chief of Operations
Physical, Technical and Area Security

FROM: Chief (C)
Information Systems Security Group, OS

SUBJECT: Proposed Executive Order on Intelligence Activities

REFERENCE: Routing Form 610, dtd 13 October 1981 with attachment, "Guidance for CIA Activities Outside (and within) the United States" with Definitions and Appendices

1. Per reference, we have reviewed the proposed Executive Order. In the narrow sense, there is nothing in this proposed Order which would restrict the mission and functions of Information Systems Security Group either in our domestic or foreign responsibilities. Paragraph II, E&F, page 2 (within United States) and II, E (outside) page 2 are so general as to adequately protect our interests across the board. (U)

2. In the broader sense, looking at Physical, Technical and Area Security and the Office of Security in general our responsibilities in Overseas Security, Technical Security, and Community Affairs again seem to be adequately protected. Our polygraph program as it relates to foreign subjects also seem to be covered in the definition of "Agent of Foreign Power" and section A under paragraph IV "General Principles" and in the broad definition of United States person. (U)

3. In short, we have no problem with this version of the proposed Executive Order. (U)
